Career Objective

Full-stack developer specializing in building fast, scalable, and user-focused web applications. Experienced across the entire development lifecycle from designing responsive frontend interfaces with React and Next.js to developing secure backend services, APIs, and database architectures. Committed to clean code, performance optimization, and creating maintainable, production-ready software.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript
Frontend Stack: React.js, Next.js, Redux Toolkit, TanStack Query, Tailwind CSS, Shadcn/ui, Zod
Backend Stack: Node Js, Express Js, PostgreSQL, Prisma, MongoDB, JWT, Firebase, Better auth
Tools: Git, GitHub, VS Code, Figma, Netlify, Vercel

Soft Skills

Adaptive Learner, Curious, Problem-solver

Projects

LearnHub | Learning Platform

[Live](#) | [Client](#) | [Server](#)

- Students and tutors can book sessions without time conflicts the system checks availability before confirming
- Three separate dashboards for students, tutors, and admins, each with their own data and permissions
- Database designed from scratch to handle bookings, reviews, and user roles using PostgreSQL and Prisma

Technology : Next.js, Tailwind CSS, TypeScript, Prisma, PostgreSQL (NeonDB), Node.js, Better auth

PawHome | Pet Adoption Platform

[Live](#) | [Client](#) | [Server](#)

- Users can browse pets, send adoption requests, and admins can approve or reject them from one place
- Real payments work through Stripe — donors can contribute to campaigns and track how close the goal is
- Pet list loads smoothly with filters, search, and infinite scroll so users never hit a dead end

Technology : React, Tailwind CSS, TanStack Query, Stripe, Express Js, MongoDB, JWT

EpiqDine | Restaurant Management System

[Live](#) | [Client](#) | [Server](#)

- Stops users from buying their own food or ordering more than what's in stock handled from server, not the UI
- Homepage automatically shows the most popular food based on how many times it was ordered
- Login works with both email/password and Google, with JWT keeping private pages protected

Technology : React, Node.js, MongoDB, Express.js, TanStack Query, Firebase, JWT

Certification

- Complete Web Development Course
- Next Level web development (Running)

[Certificate](#)
Batch-7 Nov 2025-June 2026

Language Proficiency

Bengali (Native), English (Conversational), Hindi (Conversational)

Interest

Exploring new technologies, Sustainable engineering, Web innovation
